NOTICE TO SHIPPING AGENTS

Subject: Preventive measures against the spread of the Ebola virus

Given the urgency of the public health emergency of international concern following the resurgence of the Ebola virus disease in Africa in May 2026, and given the importance to reduce the risk of it spreading across maritime borders, the Port Authority hereby introduces the following measures:

1. Any vessel arriving from a port in a country affected by the Ebola virus shall be placed in quarantine at the outer anchorage. Prior to entry, it will be subject to the maritime health control procedure in force since 2014.

2. All crew members must mandatorily be registered on the official platform of the National Institute of Public Hygiene (INHP), **www.destinationci.com**, at least 24 hours before the vessel's arrival.

Furthermore, it should be noted that any crew change will be subject to strict compliance with the provisions set out above.

I attach great importance to strict compliance to this document, which comes into effect on the date of its signature.
